PROJECT

ONLINE RAILWAY RESERVATION

- The aim of the project is to develop the software that   maintains the details of passengers who travels from any source to destination station. A new concept of "Security code" is introduced in this project so as to maintain the information of the passengers.
- **Technologies:** Visual Basic 6.0 and MS-Access 2003.

ATTENDANCE & TASK MANAGEMENT

- Developed an Attendance and Task Management System to streamline the management of student attendance and task assignments. The system features role-based access, allowing students to view tasks assigned by their respective teachers and enabling teachers to manage attendance and tasks for their own batches. Admin functionality includes managing user registrations and monitoring attendance records. Implemented using the MVC architectural pattern in ASP.NET, the project ensures data security and efficient user interactions.
- **Technologies:** ASP.NET MVC | HTML | CSS | JAVASCRIPT | BOOTSTRAP
- **Database:** SQL
